## Knowledge

React JS	92%
JavaScript	91%
Apollo-Client	85%
GraphQL	79%
HTML & CSS	96%
Figma	60%

## Education

2014 – 2018

**B.Tech in Computer Science**

College of Engineering, Perumon

# Anjali Sivan

React JS Developer

Seasoned and independent Front End React JS Developer with 4 years’ experience in blending the art of design with the skill of programming to deliver an immersive and engaging user experience through efficient website development, proactive feature optimization, and relentless debugging. Very passionate about aesthetics and UI design. Always eager to learn new technologies and apply my learnings to deliver the optimal output.

## Work experience

2020 – currently

### Front End Developer

4Labs Technologies Pvt Ltd.

- Used understanding of React fundamentals to promote better component lifecycle practices, increasing turnaround speed by 23% with 100% deadline adherence.
- Introduced wider use of isomorphic React and Node.js for web applications, decreasing load times by roughly 35%.
- Worked with advanced web development technologies like React, ECMAScript 6, Typescript, JavaScript, Immutable, Python, Bootstrap4, CSS, HTML, JS Object Notation.
- Used React concepts like JSX, components, state, and props
- Developed custom Redux Form scripts for updating the Redux store using immutable.
- Took ownership of the app, used Jira tool for requirement gathering, GitHub and Git Lab as version control systems.
- Added hooks in the project and moved some class-based components to functional components
- Used File-Saver for BLOB downloads, React-Chart, and Re charts for plotting charts.
- Used redux to store data globally and for easy retrieval of data to any component in the app.
- Used React Refs, Controlled and Un Controlled react components for different use cases.
- Configured rules for ES LINT which in turn helps the developers to write safe neat and error-less code and wrote git-hooks file to validate these lint errors before allowing developers to commit.
- Worked in SEO optimization and Performance Improvement of a website.

## Professional experience

### Project: NearShopz

Domain: React JS

- Designed, developed, and implemented the Front end for an e-commerce application.
- Implemented applications with the Lazy-Loading concept to decrease the initial loading time for the application.
- Integrated Google Maps, and Razor pay.
- Integrated firebase for push notification.
- Used socket.io for event-based communication between client and server.
- Excel upload.
- Implemented custom hooks to properly consume API on the front end and send back data captured in the UI in JSON format to the back end.
- Integrated RESTful services and GraphQL (API's). Used JSON for data transfer between front end and back end, used MongoDB Queries to interact with Mongo database.
- Optimized applications for maximum speed and scalability.

### Project: Invoice Upload

Domain: React JS

- Designed, developed, and implemented the Front end for an Invoice upload application.
- Used File-Saver for BLOB downloads, React-Chart, Re charts for plotting charts.
- Maximized use of Events and promises in ES6 and React for application control flow.
